WORK EXPERIENCE

FEB 2017 -
PRESENT

INFORMATION DESIGNER

AT MG DESIGNS - SOUTH AFRICA

At MG Designs we don't just "make" your logo or website and "make stuff look pretty". We specialise in information design - taking the time to look at the information you want to set loose in the world and making sure that it is structured so that your audience (and you) truly understand it. Then we keep in mind what it needs to compete with millions of other brands and companies out there. From all this, we carefully, and with an immense amount of detail, DESIGN what you need. We constantly incorporate Design Thinking into each and every project.

Main duties:

- Manage and run daily business processes (quoting, invoicing, accounting, acquisitions, marketing)
- Working directly with all clients on projects
- Management of all projects (from start to finish & support)
- All graphic designing (from logos and annual reports, through to banners and brochures)
- All digital designing (from email signatures and email newsletters, through to animation explainer video conceptualisation and storyboarding)
- All web designing (from simplistic HTML/PHP websites to complex custom WordPress websites)
- Taking projects from conceptualisation through to the final product, whether print or digital
